

Temperature & Mask Recognition Stand TMRS 410

TMRS 410

Introduction.

Due to the pandemic of Covid 19 the detection of body temperature, especially in closed and public places, is more and more urgent. This demand can be accomplished with the use of Temperature & Mask Recognition Stand, a product which has been manufactured by FLEXNET. The TMRS 410 is a standalone mobile Temperature & Mask Recognition Stand which is designed to be able to installed in any surface. Steel structure, stable and secure.

Scope

The TMRS 410 Stand allows the easy and quick deployment on various indoor & outdoor locations. The network connectivity can be achieved through an embedded network socket Rj45 or wireless. The Power connectivity can be done via an embedded C20 connector flange mount inlet and/or intergraded battery bank with 6 hour autonomy

Key features

- Body temperature detection
- Detection of use of protective mask
- Sound signals of notifications
- Embedded WiFi και Ethernet
- The product can operate as stand-alone or can be connected with any PC for remote access.
- Ability of photo capture in case of alarm (high body temperature and/or no use of protective mask)
- Public power network 220v, The unit has 6-hour autonomy through rechargeable batteries (duration of charge: 4 hours).
- Stand can be branded with your company logo if required.
- Simple screen installation.
- Voice messages in Greek and English (or any other language)
- **Local & Centralized Management Alarm**

Purpose

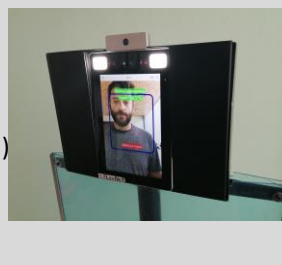

The Temperature & Mask Recognition Stand allows organizations, companies, shopping centers, public sectors, airports, hotels, services etc to be able to measure the body temperature of visitors, employees, customers without contact, fast and easily without the requirement of involvement of any person during the process.

The user does not have to touch the device during the temperature measure and the result is depicted automatically in the screen of the device.

System description.

Since the Temperature & Mask Recognition (Stand or not)is manufactured by FLEXNET it is a customized product according to the requirements of the customer.

Temperature & Mask Recognition Stand is competitive since has the additional ability of recognition of use of protective mask, something that is extremely useful in areas where the use of protective mask is mandatory, such as airports, transportation means, hospitals etc
